

Weekly Prioritisation Plan -- 4-10 May 2026

****Skill applied:**** obra/superpowers/writing-plans (atomic task decomposition for business execution)

****Execution:**** Work through tasks in strict order. Mark each done before moving to the next.

****Sources:**** Gmail - Google Calendar - Google Sheets (Leads & Pipeline) - live/state.md

Goal: Confirm all 6 calls, send every overdue action, deliver both audits, and name the website blocker -- all before Friday close.

Situation: 11 days to AGENCINA launch (2026-05-15). \$30,300 active pipeline across 7 leads. 6 calls this week -- 2 are closes (DeltaLogix, Cedar Wealth). Kontrast call is TODAY at 14:00 (~30 min away). Foster & Marsh draft unsent 12 days. 2 audits overdue. Calendar populated. No pipeline row updated since last week.

File Map

File / System	Action
Gmail Drafts	Send Foster & Marsh short draft; delete the long one
Gmail Inbox	Reply to confirm 5 remaining calls
Google Sheets -- Leads & Pipeline	Update last_contact + next_step after every interaction
live/tasks.md	Tick off completed items
live/state.md	Update at session end
live/agencina-landing.html	Name the one thing blocking launch
intel/pricing.md	Create this file with 3 packages + payment terms

TASK 1 -- Confirm Kontrast call (TODAY 14:00 -- in ~30 min)

Why first: Call is in 30 minutes. If you haven't replied, do it now.

Time required: 1 minute.

Steps:

1. Open Gmail thread: "Adding LinkedIn content automation to our scope?"
2. Reply:

Hi Nadia, 14:00 today works -- talk soon. -- Mohamed

3. Send.
4. Google Sheets -> find or add Kontrast Personalberatung row -> update:
 - company: Kontrast Personalberatung | contact: Nadia | stage: Upsell call | last_contact: 2026-05-04 | next_step: Scope confirmed -- send LinkedIn automation quote 2026-05-05

Done when: Reply sent. Pipeline row updated.

TASK 2 -- Reply to Noor Beauty (call TOMORROW 08:00)

Why: If this reply doesn't go today, the discovery call tomorrow is at risk.

Time required: 3 minutes.

Steps:

1. Open Gmail thread: "Following up -- onboarding automation for Noor Beauty"
2. Reply:

Hi Layla, Tuesday 08:00 works perfectly -- looking forward to it. I'll send a short context note beforehand. -- Mohamed, AGENCINA

3. Send.

4. Google Sheets -> add new row:

- company: Noor Beauty Group | contact: Layla | stage: Discovery booked | deal_value_usd: 2500 | last_contact: 2026-05-04 | next_step: Discovery call 2026-05-05 08:00

Done when: Reply sent. Pipeline row exists.

TASK 3 -- Send Foster & Marsh Legal draft (\$12,000)

Why: Biggest deal in the pipeline. Draft written. 12 days of silence. Zero reason to wait.

Time required: 5 minutes.

Steps:

1. Open Gmail Drafts.

2. Open "Re: AGENCINA proposal -- Foster & Marsh Legal" (the short one).

- Body reads: "Hi James, Following up on the proposal I sent over last week for the document review automation. I'll keep this short -- if the Scale package looks right, I'm ready to start the setup this week. If you have any questions on the scope or the numbers, a 20-minute call would be the fastest way to sort it. Just let me know what works. Mohamed, AGENCINA"

3. Confirm no placeholder text. Send to j.foster@fosterandmarsh.ae.

4. Open the second draft ("Following up -- AGENCINA proposal") -> delete it.

5. Google Sheets -> Foster & Marsh Legal row -> update:

- last_contact: 2026-05-04 | next_step: Awaiting reply -- follow up 2026-05-07 if no response

Done when: Short draft sent. Long draft deleted. Pipeline updated.

TASK 4 -- Follow up Zayd Property (\$6,500, 11 days silence)

Why: Quote sent. 11 days ago. Pipeline says "Follow up Tuesday" -- that was last week.

Time required: 3 minutes.

Steps:

1. Open Gmail -> compose to maya@zayd.ae.

2. Subject: Following up -- AGENCINA quote

3. Body:

Hi Maya, just circling back on the quote I sent over. Happy to walk through anything or adjust scope if needed. Let me know what works. -- Mohamed, AGENCINA

4. Send.

5. Google Sheets -> Zayd Property row -> update:

- last_contact: 2026-05-04 | next_step: Awaiting reply -- follow up 2026-05-08 if no response

Done when: Email sent. Pipeline updated.

TASK 5 -- Confirm 4 remaining inbound calls

Why: 4 warm prospects proposed specific times. Every hour of delay risks losing the slot.

Time required: 2 minutes per reply = 8 minutes total.

Reply 5a -- DeltaLogix (Karim) -- Wed 6 May 11:00:

1. Open thread: "AUDIT TEMPLATE -- QUOTE FOLLOW-UP"

2. Reply: "Hi Karim, Wednesday 11:00 works perfectly. I'll have the audit doc format and the 30-day roadmap ready. See you then. -- Mohamed, AGENCINA"

3. Send.

Reply 5b -- Cedar Wealth Advisory (Sami) -- Wed 6 May 15:00:

1. Open thread: "Picking this back up"
2. Reply: "Hi Sami, great to hear from you -- Wednesday 15:00 works. I'll pull up the original quote before we speak. -- Mohamed, AGENCINA"
3. Send. Then find the original \$6,500 quote in live/quotes/ or Gmail Sent.

Reply 5c -- Hala Ventures (Reem) -- Thu 7 May 08:00:

1. Open thread: "Outbound automation -- intro call?"
2. Reply: "Hi Reem, Thursday 08:00 Morocco time works for me. Looking forward to it. -- Mohamed, AGENCINA"
3. Send.

Reply 5d -- Atlas Build (Youssef) -- Fri 8 May 10:00:

1. Open thread: "Intro from Hicham -- quote automation"
2. Reply: "Hi Youssef, Friday 10:00 works well -- does that slot work for you? Looking forward to showing you how we've approached this kind of workflow. -- Mohamed, AGENCINA"
3. Send.

Done when: All 4 replies sent. All threads marked read.

TASK 6 -- Deliver Cotton & Stitch audit (4 days overdue)

Why: Audit was due 30 Apr. Reema Saleh is waiting. Every extra day risks the relationship and the referral.

Time required: Depends on audit state.

Steps:

1. Check live/ or Google Drive for the Cotton & Stitch audit draft.
2. If draft exists: review, finalise, export as PDF.
3. Save as draft to reema@cottonstitch.com:
 - Subject: Your AGENCINA Audit -- Cotton & Stitch
 - Body: short apology for the delay, attach PDF, note 2-3 next steps.
4. Mohamed reviews draft -> sends.
5. Google Sheets -> Cotton & Stitch row -> update:
 - stage: Audit delivered | last_contact: 2026-05-04 | next_step: Follow up on findings 2026-05-07

Done when: Audit emailed. Pipeline updated.

TASK 7 -- Deliver Najim Travel audit (2 days overdue)

Why: Due 2 May. Layla Al Mahri is waiting. Same urgency as Task 6.

Time required: Depends on audit state.

Steps:

1. Check live/ or Google Drive for the Najim Travel audit draft.
2. If draft exists: finalise and export as PDF.
3. Save as draft to layla@najimtravel.com:
 - Subject: Your AGENCINA Audit -- Najim Travel
 - Attach PDF. Short note on next steps.
4. Mohamed reviews draft -> sends.
5. Google Sheets -> Najim Travel row -> update:
 - stage: Audit delivered | last_contact: 2026-05-04 | next_step: Follow up 2026-05-07

Done when: Audit emailed. Pipeline updated.

TASK 8 -- Post-discovery follow-ups: Lunara, Tahseen, Dahab

Why: All three had discoveries 29 Apr-1 May. Nothing in pipeline since. These go cold within a week.

Time required: 3 minutes per email = 9 minutes total.

For each:

1. Write a follow-up:

Hi [Name], following up after our discovery on [day]. Based on what we discussed, [one sentence on the workflow you'd build for them]. I'm ready to put a quote together -- shall I go ahead? -- Mohamed, AGENCINA

2. Send to:

- Lunara Handcare: mariam@lunara.ae (discovery 29 Apr, \$2,500 est.)
- Tahseen Tutoring: hala@tahseentutoring.com (discovery 30 Apr, \$4,900 est.)
- Dahab Wellness: yara@dahabwellness.sa (discovery 1 May, \$2,500 est.)

3. Google Sheets -> update each row:

- last_contact: 2026-05-04 | next_step: Quote pending reply

Done when: 3 emails sent. 3 pipeline rows updated.

TASK 9 -- PREP Noor Beauty discovery (calendar block: tonight 21:00)

Why: Call is tomorrow 08:00. No prep = poor discovery = no quote.

Time required: 20 minutes.

Steps:

1. Re-read Layla's email. Note: paper intake -> POS re-key -> WhatsApp follow-up. 8h/week. 14 people, 4 locations.
2. Prepare 5 discovery questions:
 - How many new clients per week go through this process?
 - Who does the re-keying -- one person or shared across staff?
 - What POS system are they using?
 - Is the WhatsApp follow-up templated or fully manual?
 - What does success look like in 90 days?
3. Draft a rough solution hypothesis (don't pitch on the call -- validate it).
4. Confirm pricing range in your head: \$2,000-\$3,500 for this scope.

Done when: 5 questions written. Solution hypothesis drafted. Pricing range confirmed.

TASK 10 -- PREP DeltaLogix close call (calendar block: Tue 20:00)

Why: Scope is aligned. This call ends with a yes or a stall -- prepare for both.

Time required: 30 minutes.

Steps:

1. Create a 1-page audit doc format example (even a rough template is enough).
2. Write the 30-day implementation roadmap:
 - Week 1: Setup + integrations
 - Week 2: Workflow build + testing
 - Week 3: UAT with client team
 - Week 4: Go-live + handover
3. Decide your payment terms position:
 - Recommended: 50/50 -- half on signing, half on delivery
 - Fallback: NET 30 if they push (accept only for deals over \$8k)
4. Have the proposal PDF open and the quote number ready before the call.

Done when: Audit template exists. Roadmap written. Payment terms position decided.

TASK 11 -- Website: name the one blocker

Why: 11 days to launch (May 15). If the blocker isn't named today, it won't be fixed in time.

Time required: 15 minutes to investigate.

Steps:

1. Open live/agencina-landing.html in the browser.
2. Answer: what is the single thing preventing this from going live?
 - Missing hosting? -> pick one and set it up.
 - Missing copy? -> use the /copywriting skill.
 - Missing sections? -> use the /frontend-design skill.
 - Needs a domain? -> register it today.
3. Write the answer in live/state.md under "Website blocker:"
4. Schedule a 2-hour fix block for Wed or Thu.

Done when: Blocker identified and written to live/state.md. Fix block in calendar.

TASK 12 -- Finalise pricing structure

Why: Needed on every call this week. DeltaLogix payment terms question lands Wed. No clear answer = lost deal.

Time required: 45 minutes.

Steps:

1. Define 3 packages:
 - Starter: single workflow, 1 integration, 2-week delivery -- \$1,500
 - Growth: multi-workflow, CRM integration, 30-day support -- \$3,500
 - Scale: full ops automation suite, team training, 90-day support -- \$8,000+
2. Add payment terms standard: 50/50 (50% on signing, 50% on delivery).
3. Add what's excluded: custom software dev, third-party licences, hardware.
4. Save to intel/pricing.md -- this becomes the single source of truth.

Done when: 3 packages defined. Payment terms written. File saved at intel/pricing.md.

Self-Review Checklist

- [x] Every task has a specific action (no "push forward", "check in", "touch base")
 - [x] Every email has a verbatim body or exact instruction to write one
 - [x] Every pipeline update specifies the row, fields, and values
 - [x] No TBDs, no "figure out later", no "similar to Task N"
 - [x] Every task has a "Done when:" definition
 - [x] Deadline items are first (Kontrast TODAY, Noor Beauty today for tomorrow)
 - [x] All 5 pending inbound replies mapped to tasks (1, 2, 5a-5d)
 - [x] Both overdue audits have delivery tasks (6-7)
 - [x] All 3 post-discovery follow-ups covered (Task 8)
 - [x] Both close call preps scheduled (Tasks 9-10, calendar blocks exist)
 - [x] Launch deadline covered with concrete investigation (Task 11)
 - [x] Calendar already populated (done at session start -- 6 meetings + 2 prep blocks)
-

Execution Order (strict)

Order	Task	Deadline
1	Kontrast call confirm	TODAY -- 14:00 in ~30 min
2	Noor Beauty reply	TODAY -- call tomorrow 08:00
3	Foster & Marsh draft	TODAY
4	Zayd Property follow-up	TODAY
5	Confirm 4 remaining calls (DeltaLogix, Cedar, Hala, Atlas)	TODAY
6	Cotton & Stitch audit delivery	Today or Tue
7	Najim Travel audit delivery	Today or Tue
8	Lunara / Tahseen / Dahab follow-ups	Tue
9	Noor Beauty discovery prep	Tonight (21:00 block)
10	DeltaLogix close call prep	Tue night (20:00 block)
11	Website blocker investigation	Wed or Thu
12	Pricing structure	Before Wed 11:00
